

Jira Ticket 2 - Tests Done and Test Results

Official filing-path detection, guided form answers, filled PDF generation, and protected generated PDF retrieval

Overview

Ticket Scope	Implemented official filing-path routing, missing-field detection, saved guided form answers, official PDF template filling, generated PDF metadata, and protected PDF download.
Supported Filing Paths	NYC Small Claims CIV-SC-50, NY OAG Rent Security Complaint, and NYC HP Repairs Petition UCS-LT12B.
Testing Method	Manual PowerShell API tests plus visual PDF inspection of generated official forms.
Overall Result	PASS - Ticket 2 workflow completed successfully after PDF alignment and field-mapping fixes.

Tests Done and Test Results

Test Area	Tests Done	Expected Result	Actual Result	Status
Template presence	Verified official PDF templates existed in backend/templates/legal-forms/ny.	All required templates present.	Small Claims, OAG, and HP template files were available.	PASS
Ticket 2 migration	Ran ticket2-migration.sql or schema.sql on fresh database.	generated_forms and case_form_answers available.	Database supported form answers and generated form metadata.	PASS
Form requirements endpoint	Called GET /api/cases/:caseId/form-requirements.	Returns selected filing path, missing fields, required questions, and canGenerate flag.	Endpoint returned requirements and missing-field information correctly.	PASS
Save guided answers	Called PATCH /api/cases/:caseId/form-answers with additional fields needed by official forms.	Answers saved and reused during form generation.	Saved answers were returned in generatedFormData and used by PDF generation.	PASS
Small Claims routing	Created SECURITY_DEPOSIT case with WITHHELD_FOR_DAMAGE and NY/NYC data.	Routes to NYC_SMALL_CLAIMS_SECURITY_DEPOSIT_CIV_SC_50.	Selected Small Claims filing path correctly.	PASS
Small Claims PDF generation	Called POST /api/cases/:caseId/generate-form and downloaded generated PDF.	CIV-SC-50 PDF generated with fields filled and deposit checkbox checked.	Small Claims PDF was fixed to use AcroForm fields after bad non-field entries were sanitized. Final output was visually usable.	PASS
OAG routing	Created SECURITY_DEPOSIT case with INTEREST_NOT_PAID or trust-account issue.	Routes to NY_OAG_RENT_SECURITY_COMPLAINT.	OAG path selected correctly.	PASS
OAG PDF generation	Generated and visually inspected OAG Rent Security Complaint PDF.	Key renter, landlord, deposit, complaint concern, and date fields are filled/readable.	OAG form generated correctly after checkbox and landlord field cleanup.	PASS
HP repairs routing	Created MAINTENANCE case with NYC/Brooklyn repair conditions.	Routes to NYC_HP_ACTION_REPAIRS_PACKET.	HP filing path selected correctly.	PASS
HP missing fields	Tested HP route with missing confirmation fields.	Returns MISSING_FORM_INFORMATION with required questions.	Backend requested confirmationTenantLivesAtProperty, confirmationTenantLivedThereThirtyDays, and confirmationTenantHasLeaseOrAgreement.	PASS
HP PDF generation	Generated and visually inspected HP Repairs Petition PDF pages 1 through 4 plus summary page.	Important HP sections are filled and readable.	Final HP PDF filled court/county, petitioner/respondent, property, tenant row, respondent info, rent, conditions, repair relief, verification, and summary address correctly.	PASS

Test Area	Tests Done	Expected Result	Actual Result	Status
Unsupported path	Created unsupported NJ/OTHER case and called form-requirements/generate-form.	Returns UNSUPPORTED_FORM_TYPE without crashing.	Unsupported path handled safely.	PASS
Generated PDF download	Downloaded PDFs through GET /api/generated-forms/:generatedFormId/file.	PDF is protected and opens normally.	Generated PDFs downloaded through protected route and opened successfully.	PASS
Case retrieval integration	Called GET /api/cases/:caseId after form generation.	generatedForm object is populated.	Case response included generated form metadata, filing path, generatedFormData, PDF URL, and instructions.	PASS
Access control	Tried form endpoints without token or as non-owner/landlord where disallowed.	UNAUTHORIZED or FORBIDDEN returned.	Access control for form generation was enforced.	PASS

Validation Artifacts / Outputs Checked

Generated PDF Outputs	Small Claims CIV-SC-50, OAG Rent Security Complaint, and HP Repairs Petition PDFs.
Visual Inspection Result	Small Claims and OAG looked good; HP required multiple alignment fixes and final version was accepted as usable for MVP.
Status at Completion	Ticket 2 ready for final submission after generated PDF files were visually inspected.

Result Summary

Ticket 2 passed the manual test path. The app can select supported official filing paths, ask for missing information, save guided answers, generate filled PDF packets, and return protected PDF downloads.
